Series 752

Bidirectional Knife Gate Valve

The Bray Series 752 features a robust steel reinforced perimeter seat which provides bidirectional zero leakage shutoff.

The replaceable steel reinforced perimeter seat is mechanically retained between both halves of the two-piece bolted body for unsurpassed performance in the most demanding applications.

Shown with stem cover (optional).

- 1 Designed for easy, quick conversion between manual and pneumatic actuation. Featuring a lubricant injection port for continuous, smooth operation with minimal maintenance.
- 2 Clevis design and horizontal bolting stabilizes gate ensuring proper alignment.
- 3 Standard multi-layer square packing seal provides exceptional gland sealing.
- 4 Unrestricted flow path with minimal pressure drop achieved through full port valve design.
- 5 Deflection resistant gate design ensures consistent alignment for industry leading durability.
- 6 Replaceable steel reinforced elastomer perimeter seat ensures bidirectional zero leakage shutoff.
- 7 Two-piece bolted body for easy maintenance and seat replacement.
