
FLOW-TEK SERIES 51 2 Piece Full Port Brass Ball Valves

Flow-Tek's Series 51 brass ball valves are the ideal utility valve for low pressure commercial applications. The two-piece body construction offers simple quarter turn operation, low operating torque and bottom entry blowout proof stems. The balls are hard chromium plated brass for added

durability and longevity. The Series 51's full port design minimizes pressure drops while maximizing flow.

The threaded end connections are manufactured with deeper grooves to ensure a positive connection. Easily adjustable stem packing seals prevent

media leakage through the stem. Other features include vinyl insulated handles. This is an excellent valve for use in general service on water, steam, oil or compressed gases.

All Series 51 ball valves are CSA and UL listed.

Size	Pressure Rating	Steam Rating	Temperature Range	End Connections	Body Material
1/4" to 2" 8mm to 50mm	600 psi WOG 41.4 bar	150 psi WSP 10.3 bar	-50°F to +400°F -46°C to +204°C	Threaded - NPT	Brass
2-1/2" to 4" 65mm to 100mm	400 psi WOG 27.6 bar	150 psi WSP 10.3 bar

SPECIFICATIONS

Threaded end connections meet ASME B1.20.1 NPT.

- > 1/4" - 2" valves rated to 600psi non-shock cold water, oil, gas (WOG)
- > 1/4" - 4" valves rated to 150psi saturated steam (WSP)
- > 2-1/2" - 4" valves rated to 400psi WOG
- > All valves are CSA & UL listed

25	Handle	Zinc Plated Steel	1
26	Handle Nut	Zinc Plated Steel	1
28	Handle Sleeve	Vinyl	1

PRESSURE/TEMPERATURE

TESTING

All valves are tested in accordance with MSS-SP72 at 100psi air under water in open and closed positions.
