SRH Series Spring Return Handle (Deadman Handle)

For use with compatible 1/4" – 2" Ball Valves

Flow-Tek's SRH Series Spring Return (Deadman) Handles are manufactured from heavy duty stainless steel components to withstand frequent daily use in refueling, sampling, drains, and other OSHA applications that require positive closure of a manual valve. Each SRH Handle has a locking device as standard to lock the valve in the preferred position. The SRH Handle is available in three sizes that mount directly to the rugged investment cast ISO 5211 mounting pads on compatible Flow-Tek full or standard port industrial ball valves.

All compatible Flow-Tek valves utilize live loaded packing which provides longer periods between packing adjustment and maintenance, reducing the need to remove the SRH handle for valve maintenance.

Each SRH Handle can be easily retrofitted on existing Flow-Tek lever operated ball valves provided one follows the compatibility chart shown on page 2.
