For full details see the Installation and Maintenance Instructions (IM-P124-09) supplied with the product.

Installation note:

The trap is designed for installation with the capsule in a horizontal plane and the cover at the top, preferably with a drop leg immediately preceding the trap. Installation in a vertical plane is also acceptable. When welding the trap into the pipeline, there is no need to remove the capsule, providing the welding is done by the electric arc method. Suitable isolation valves must be installed to allow for safe maintenance and trap replacement.
